

Dr. Greiche
GLASS

A VISIONARY MAN HAD A GREAT
DREAM AND WITH IT HE BUILT
AN EMPIRE.

RIP DR. MAGDY GREICHE

DR. GREICHE

Dr. Greiche Egypt is the leading glass processor in the Middle East and Africa. By providing quality glass solutions in the automotive, building, decorative, home appliance, lighting, mirrors, security sectors, and glass installation services.

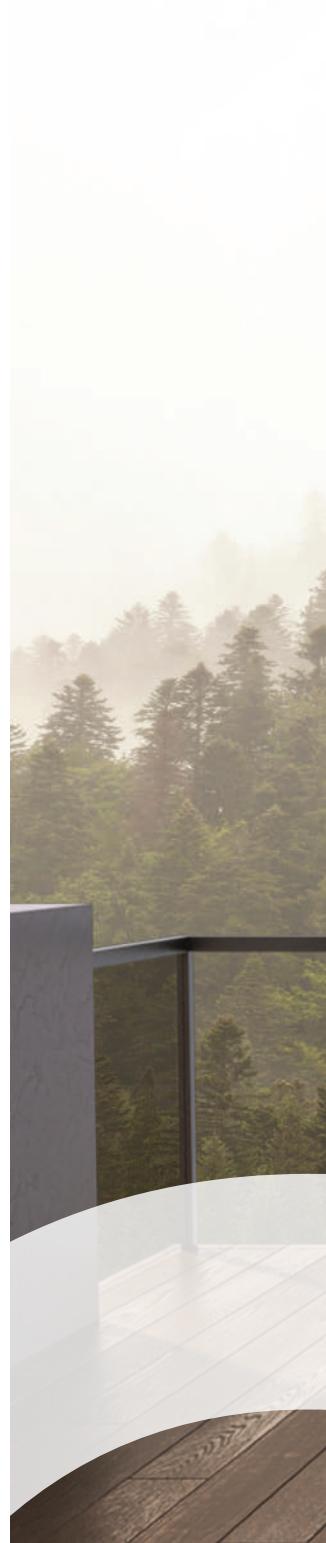

By focusing on our exports, the “Dr. Greiche” trademark has reached more than 40 countries around the globe.

Our “definition” of GLASS has changed from a see-through, solid material to a high-performing product that guarantees protection, thermal & acoustic insulation, solar control and energy conservation.

Dr. Greiche’s philosophy focuses on client satisfaction, believing in the importance of post-sales services and maintenance, which leads to long-lasting partnerships with our clients.

Our competitive edge lies in our capability to bend and process larger than standard glass dimensions; our quality laboratories apply the most up-to-date quality control tests and procedures, guaranteeing our customers an impeccable product.

Today, headquartered in Egypt’s 10th of Ramadan Area, Dr. Greiche employs approximately 1,650 employees and is still expanding.

VISION

Our vision is to be at the forefront of the global glass processing market by exceeding customer expectations and providing trust through reliability, safety, and durability without compromising aesthetics.

Our position as leaders in the region and as pioneers in the Middle East and Africa lifts our vision to higher sights, building a name that is synonymous with exceeding international quality standards.

Through the efforts of our dedicated team, this vision has come to fruition in the region with the aim of creating the same image for the Dr. Greiche brand throughout the world.

MISSION

To increasingly expand in new markets around the globe while continuously gaining our clients' confidence and loyalty.

To deliver high quality products that comply with and exceed international standards.

Maximum flexibility in providing our services to meet the expectation of a fast-changing world is our way of honouring our international customers.

OUR PRODUCTS

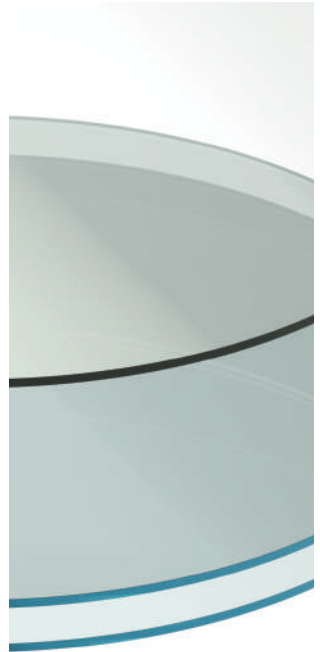

LAMINATED GLASS

We're the only supplier in Egypt that manufacture Jumbo Glass up to 3m X 6m. Laminated Glass comes in different thicknesses according to your needs.

SOFT COATING GLASS

We have several soft coatings on the glass to serve different needs; such as IR cut for Infrared Rays and low E Glass for low emission of Infrared and Ultraviolet radiations.

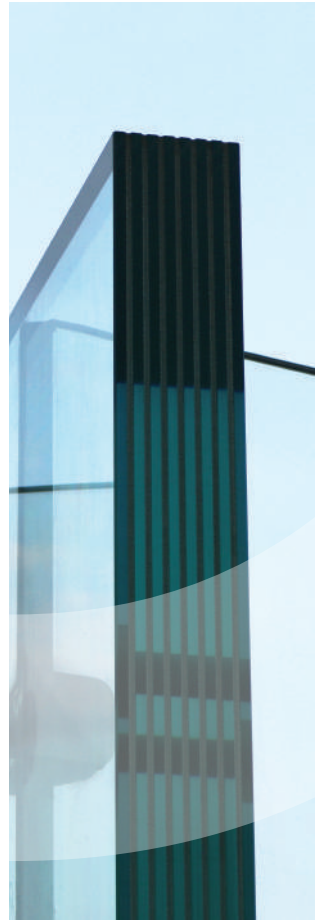

TEMPERED GLASS

Tempered Glass comes in sizes up to 2.85 m in height X 6 m in width and is used in different industries.

HIGHLY INSULATED GLASS

Insulated Glass can be double-glazed or triple-glazed. We manufacture insulating glass dimensions up to 3 m x 5 m with unit thicknesses up to 60 mm and combine different factors to reach customer-required performance for solar control, thermal insulation, UV blockage, sound insulation and resistance to thermal stress.

DECORATIVE GLASS

We have many options for decorative glass, such as; tinted glass, Matlux, Sandblasted, patterned and frosted, depending on the desired look and the level of privacy required.

SECURITY GLASS

We have Burglarproof Glass, Bulletproof Glass and Anti-Explosive Glass. All our security glasses are according to international standards and specifications and approved by the Egyptian Armed Forces Technical Research Center.

SUSTAINABILITY

Our environmental management system provides support for achieving the goals of our environmental policy and managing the interaction between plants and corporate services.

It enables us to identify our strengths and weaknesses, control and reduce our environmental impacts, play a pro-active role in developing towards new legislation. It also allows us to minimize environmental risks and costs and to retain and improve social trust and customer satisfaction.

Our EMS lays down the environmental policy and objectives that provide the framework for the day-to-day activities and for environmental initiatives and action programs within the Group.

It describes the environmental roles, responsibilities and organization at plant and group level.

That's why Dr. Greiche's painting used in Automotive and Home Appliances are water based and not solvent based, we also make Mirrors that are copper and LED free.
