“Enhance Your Appliances
with Premium Glass”

Dr. Greiche
GLASS

Who We Are

Dr. Greiche Egypt is the leading glass processor in the Middle East and Africa. By Providing quality glass solutions in the automotive, building, decorative, home appliance, lighting and security sectors, as well as providing glass installation services.

Our “definition” of GLASS has changed from simply a see through, solid material to a highly performing product that guarantees protection, thermal & acoustic insulation, solar control and energy conservation.

Dr. Greiche’s philosophy focusing on client’s satisfaction, and believing in the importance of post sales services and maintenance, leads to long lasting partnerships with our clients.

Our competitive edge lies in our capability to bend and process larger than normal glass dimensions; and our quality laboratories, applying the most up-to-date quality control tests and procedures, guaranteeing our customers an impeccable product.

Today, headquartered in the 10th of Ramadan Area in Egypt, Dr. Greiche employs approximately 1,650 employees and is still expanding...

What We Stand For

MISSION

To increasingly expand in new markets around the globe while continuously gaining our clients' confidence and loyalty. To deliver quality products that comply with and exceed international standards. Maximum flexibility in providing our services to meet the expectation of a fast-changing world is our way of honoring our international customers.

VISION

Our vision is to be on the forefront of an ever-changing world, and to exceed the customer's expectations in quality and services.

VALUES

Dr. Greiche is driven by four basic values; Accountability, Transparency, Quality, Reliability

Our Home Appliances Products

Dr.greiche offers a wide range of glass solutions for home appliances, commercial refrigeration equipment, food displays and lighting glass..

- Refrigerators
- Freezers
- Coolers

- Indoor & Outdoor
Lighting Glass

Safe and stylish oven glass is central to the look of an appliance and a key focal point for a kitchen. It also provides a view inside the oven, ensures safety, controls temperature, and makes cooking easier and more enjoyable. Dr.Greiche glass solutions have the versatility to meet those challenges in style. Dr. Greiche innovations for oven glasses include a portfolio of heat-reflective coatings that protect the consumer by controlling the temperature of the outer door, as the inner door coating reflects heat back inside the appliance for lower energy consumption. And all our oven glasses meet the tough impact and heat resistance requirements in the oven environment.

- Cookers
- Ovens
- Microwaves

Our Factory

Established in 1985, Dr. Greiche has maintained steady growth, currently operating six factories. Factory number 3 is a distinguished entity, recognized as a trusted manufacturer of high-quality flat glass sheets with the Home Appliances production line to our customers around the world. Dr. greiche home appliances has the latest grinding, drilling, laser cutting machines and printing lines in the middle east with a capacity of 135,000 m² monthly.

The Glass That Is Dealt With Through The Sector Is:

Glass type	Application	Characteristics	Available thickness
CLEAR GLASS	Used in the ovens, microwaves, cookers, lighting glass, and refrigerator (whether shelves or sides).	High transparency.	- 4mm - 5mm - 6mm - 8mm - 10mm
REFLECTIVE GLASS	Used in ovens, microwaves, and cookers.	Distinctive aesthetic shape and light reflection.	- 4mm - 5mm
LOW-E GLASS	Used in cookers and refrigerators	High efficiency in thermal insulation, which is reflected in the energy saving of these devices.	- 4mm

Dr. Greiche’s glass products for the home appliances sector go through different quality assurance measures. These pivotal tests encompass:

- o Fragmentation Test
- o Impact Test

For the lighting glass, we recognize the importance of adhering to global quality standards. Consequently, our products undergo different tests including the crucial IK-08 test which is required globally

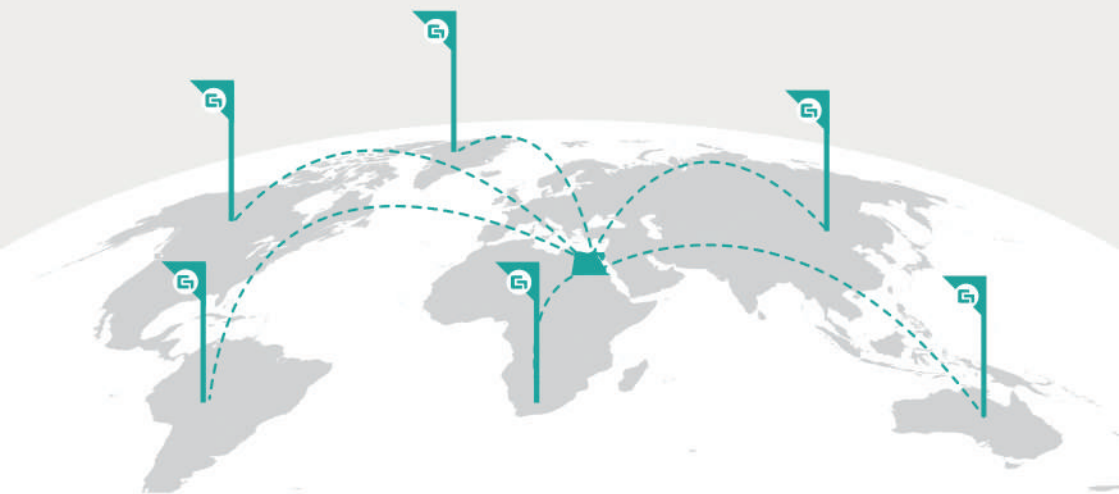

Low-E glass offers exceptional thermal insulation efficiency, resulting in cooler and safer oven.

Our Exports

Dr.greiche exports to 32 Countries in Europe, Middle East, Africa, Asia and North America and south America.

Export represents 22% of total turnover.
